# Weird But True: 300 Outrageous Facts

## Synopsis

At last, all those weird but true facts that readers of National Geographic Kids love so much are collected into a fun-filled book that you'll come back to again and again! *Weird But True* is based on the hugely popular magazine page of quirky, fun facts that many readers of National Geographic Kids magazine turn to first. Why? Well did you know that... Peanut butter can be converted into a diamond? The world's oldest pet goldfish lived to be 43 years old? The world's longest soap bubble was as long as four school buses? On Neptune, the wind blows up to 1,243 miles an hour? An elephant's tooth can weigh as much as a bowling ball? All of the facts in this handy book will amaze friends and family: *Animals Superpowers...Chills and Thrills...Eat or Be Eaten...Mini and Mega...Wild and Crazy*, and much, much more. Adjacent pages for such facts present a one-paragraph explanation of how that fact is possible or why it is so. Wacky facts, fascinating information, and lively art combine in this easy-to-browse, casual reference book that is sure to give young readers hours of fun.

## Book Information

Age Range: 8 - 12 years

Grade Level: 3 - 7

## Customer Reviews

My son loves these books. We started reading National Geographic Kids books when he was about

six (he's nine now) and I can honestly say that these books have been instrumental in teaching him to read. His favorites are those from the "Weird, But True" series. We own the first five books in the series and have the ones not yet published on pre-order. One weekend last spring, our son actually read one entire 300 pg. book from this series to my husband and I over the course of two days - 50 pg.s three times a day until he'd finished. I mention this because last year my son was sent to a reading specialist because his teacher was concerned that he was reading below his age-level. Although I was happy for him to receive the extra attention from the specialist, I always doubted that he had any real problems reading because he read the Nat'l Geo books to us constantly. Thankfully, I was right. He no longer sees the reading specialist, reads above his grade-level, and even reads out-loud to his classmates at lunchtime. Why is this so important? Because kids are often labeled as poor readers when it's not that they can't read, but rather that they simply aren't interested in what they are being given to read. My teen-age step-daughter grew up thinking that she was a poor reader, too. That all changed when I gave her the Twilight Series. She read the last book, "Breaking Dawn," (756 pages) in less than 48 hours! There are several elements that make the Nat'l Geo Weird, But True series so appealing, particularly to elementary aged boys. The layouts are very simple, not cluttered. Each fact is only one or two sentences long. The font is much larger than what you would find in a typical chapter book designed for this age group.
