# Indestructibles: Plip-Plop Pond!

## Synopsis

Here is a book babies can really sink their gums into. Built for the way babies read, Indestructibles are printed on an amazing paperlike material that can't be ripped, torn, or punctured.

Indestructibles are 100 percent safe and nontoxic, and if they get too funky, just throw them in the washing machine or dishwasher. They're made for baby to hold, grab, chew, pull, and bend, and are designed to create an even more special bond between reader and baby. Printed without words, the parent gets to make up the story, or just cuddle with baby while they explore together. Plip-Plop Pond! is about a frog who visits his friends in the pond. Kaaren Pixton's art is bright, swirling with color, and reminiscent of Eric Carle, and it attains an almost 3D richness on the special paperlike stock of the book.

## Customer Reviews

Plip-Plop Pond has lovely water color-like illustrations of various pond creatures. I like the style of the artist, who appears to also be the creator of this series of Indestructible books along with her daughter-in-law. (Side note: The daughter-in-law is the mother of triplets and must understand that innate need that babies have to want to destroy pages of paper). I own five books from the series and will cut and paste a similar review for all five of them on . I started out with two books and immediately bought three more and my 5.5 month old baby has been using and enjoying these

books since about 4 months old. I let my baby hold the book and explore it on his own and I don't do much beyond pointing to something on the page and saying, "That's a fish!" or something similar. My baby doesn't constantly want to hear a 20 page story, he just wants to hear my voice while he joyfully attempts to rip up the book. Besides being a new mom, I'm also a librarian; formerly a Children's Librarian although now I work with adults. In any case, I'm aware of the importance of introducing the concept of books early on to get little ones prepared for reading one day and to teach them that books are enjoyable. For babies, that means getting them used to feeling a book (sometimes tasting, it can be hard to get them not to do that and it's how they explore), holding it and encouraging them to look at the pictures. I completely understand the criticisms that some of the users have for the fact that these books are wordless, thus preventing the chance to make word associations and the like. But these books are just plain fun and beautiful to look at and true to their claim, absolutely indestructible, which is all I can ask for in a book for my infant.
