## Customer Reviews

I think that these books are absolutely wonderful. My 1 yr old son has such an interest in these books and we read them over & over. They are so easy to memorize for rides in the car too! My son has not found a book by Sandra Boynton that he does not love, as a matter of fact, me too!

These were among the first books we bought for our son, who is now one year old. We like them so much we ended up buying the other box set, too. And some other Boynton books as well. Sandra Boynton's books have a terrific rhythm to them that makes them fun to read. "The Going to Bed Book" was an immediate hit with my husband because it's fun -- a great bedtime story, but not as sappy as classics like "I Love You as Much." The other three titles in this collection score just as well with our son and with us. What I love is how these books work on several levels. For the youngest readers, they present eye-catching illustration and simple rhymes. As the child gets older, the books have larger lessons to teach, from the concept of "Opposites" to the deeper, more poignant message of "But Not the Hippopotamus," the tale of a hippo who's left out of all the fun until the other animals finally invite her to join in. If you're asking yourself whether you really need

FOUR titles by Sandra Boynton, well, at least for us, four was only the beginning. So take advantage of the low price of buying them as a set.

These four books are all very good! My 15 month old loves them now as much as she did when she was first born. In fact, Boynton books are the only books she likes now in her active toddler stage. They are the only books she will sit still for, and I have over 100 books for her to choose from! They all have cute, short, catchy rhymes that are fun to listen to and read. The colors are very bright and the animals/creatures are really cute! Her favorite is The Going To Bed Book among these four, but she likes them all very much.

When I first got this group of books (and also the other set), it didn't hold my daughter's attention. She was still just a baby, so I'm assuming the pictures didn't thrill her. Then she turned 18 months... In the last three months I think I've read each of these books at least twice a day. I know them by heart and she does too. In fact she sleeps with a couple every night!

These are must buy books for the kids!!. The books are great. I've never bought Boynton's books before and after having this volume : The Going to Bed Book, But Not the Hippotamus, Opposites, Horns to Toes; I must say that I am going to get more of Sandra Bynton's books. The rhymes are short and simple but nice and I think this is important for infants as their attention span is pretty short. The illustrations are wonderful and kids won't go tired of them forever as they are cartoon characters. My 8 month old daughter seems to enjoy listening to the rhymes and looking at the pictures as I enjoy reading the books to her. Get these volume now.....I really recommend them.

This was originally bought for my 1 year old son for Christmas, and had to be replaced due to water damage. We are such fans of Boynton and this little volume is perfect. Each story is just the right amount of silly and the artwork is darling. My 8 year old is always grabbing these to read to her 1 year old brother. I will be adding more of these stories to my library, for sure!

We discovered Boynton back in the 80s when we desperately sought something to read to our children besides Pat The Bunny and Goodnight Moon. Laughed out loud at the surprise twist and colorful characters. Since have purchased same books many times for gifts and to replace the ones we wore out on four kids. Now starting to read them to grandchild and just as enjoyable as I remembered from 30 years ago.

Fun little set! My son loves the Going to Bed book! The others are cute too, but that one is his favorite. I did notice that these books are just slightly smaller than the other S.B. books we own. I thought that was strange, but not a big deal.
