## Customer Reviews

My 2 year old LOVES this entire series of Nat. Geo Readers... I have purchased about 25 different titles, "pre-readers" as well as Level 1 & 2 readers. She loves them all & will ask for certain ones. The "pre-readers" level books are extremely simple & great because she memorizes the words & can "read" it herself. We love the more advanced ones too, because there is more information to talk about. I have learned quite a few facts, myself!) What a great series. The price is reasonable & pictures are great. These are really getting her interested in nature, animals & science... I will continue to buy these as they are released, for our collection!

Nice pictures, my 1&1/2 y.o. really likes to look through the pages. The vast majority of children's

books have pictures which have cartoon characters and sometimes the kids can't recognize an animal in real life. This one has real photos, so there is no confusion about how exactly the animal looks like - wonderful!

Mixed emotion about this one. A ton of great pictures of rain forest animals and a lot of comparisons - big to small, swing to slither, etc. But only two pictures of sloths- more basic than could be- what about diet and habitat? It's ok, but not as great as some of the others in the series. Still, gotta love science at this level- kids enjoy them!

I expected this to be solely about sloths. It's pretty much a picture book about rainforest animals. It's a nice picture book. It just was a bit disappointing.

Prob should have don't more research. One sentence per page / shared page. Great pictures. Not good for meaningful text.

This is a great book for beginning readers :-)) but not really about rabbits if that is what you are looking for

my daughter loved this for her birthday! Sloths are under appreciated!!!

This book is adorable and my son loved the real life pictures!
