## Customer Reviews

Annie Kubler's ROW, ROW, ROW YOUR BOAT is a great little book. We have had this book for about a month at my house, and my 10-1/2 month old baby and a good friend who is about 22 months old both enjoy this book a lot. My son took to ROW, ROW, ROW YOUR BOAT immediately. It is a bigger than average board book, about 8 inches by 8 inches, but not too big for him to pull the book into his lap and comfortably page through. The colors are bright, and the babies that Annie Kubler draws are charming. The words are pretty simple. It consists of three verses of the old song. I love that ROW, ROW, ROW YOUR BOAT shows children singing the song and moving to it. The first time I read this to our 22 month old friend, he was immediately pulled in when I started using the movements that you see in the pictures. He liked it so much that he asked me to read it again (well, sing it again) about ten times. My 10 month old son loves it so much that it is the first book he

asks for by name. "Rowrowrow!" This book has inspired several boat-related games with our two babies. We are loving it!

I bought this book for my son when he was about 12 months old. It immediately became his favorite book...he loved for me to read/sing it to him before bedtime. He's now 20 months old and still has me singing it to him almost everyday. He loves to flip the pages with me and study the drawings of the babies. The art work is absolutely wonderful. He usually only goes for books with real life pictures, but this one is an exception. When I first picked up this book I thought, "Doesn't this song only have 2 verses...it might get old real quick." But I was pleasantly surprised to see there was much more to it...we love sharing the new verses to this old favorite with other kids...they love it too!

This book is so simple, yet so perfectly done. It has been a favorite of both my son and my niece from about 12 months on (he's now 19 months and still loves this book). It's almost impossible to "read" this book without breaking into jovial song -- "Rock, Rock, Rock your boat, Gently down the stream, If you see a crocodile, Don't forget to scream!" (there's one more verse but I won't give it away) The book is larger than most of our other board books and has wonderful illustrations of happy babies acting out the lyrics. I have found that my son pays attention and enjoys having books read to him most when the books are rhymes or songs (otherwise he prefers pointing out things he knows by name in the illustrations, but doesn't care so much to hear the story). This book has been a real winner in our house. I highly recommend it as a first birthday gift to any baby whose parents like to sing to him/her.

My daughter loves this book. The illustrations are engaging because they are simple. When we read this one it is never just once. This is a get excited playtime book, not a bedtime book.

One of my son's favorite songs is Row Row Row Your Boat. The book has lovely pictures and three verses of the song. It was short enough to keep his attention and long enough to give variety when we have to read it over and over again ;-)| would definitely recommend if your little one loves singing/music.

So my toddler will pull this one off her shelf, run to me so I can sing it, and go to her daddy to do the motions. The funny thing is, we can do this hundreds of times in a day....and neither my husband nor I are irritated by it. I guess it's the smile on her face when she plays with us during this song,

and her engagement with the large illustrations. Another winner!

My 13 month old asks for the book with "ro ro ro". Its pictures are cute and sweet. The book is short, considering its just row your boat lyrics, but we read it a few times and my son loves it every time.

Incredibly simple, incredibly adorable and incredibly affective little board book for toddlers. This jolly book illustrates the song beautifully. My little grandson could not get enough of this book - lovely!! see some poor reviews for this as a kindle book and even though I am a kindle convert through and through I can understand why. I have read the board book many times with a toddler on my lap. He likes to turn the pages and give the book an occasional excited shake! Just not the same on Kindle for this type of reading experience or age group.
