Customer Reviews

Young children who love to see big construction vehicles will like the images used in this book. There are very few "earth movers" actually identified and discussed in this book. The text in one section refers to a backhoe however the images in those sections show an excavator. Another problem is that there is an image in the beginning of the book which does not explain the machine (which happens to be a grader.)

my grandson is loving construction vehicles, all kinds, and this book is great shows actual pictures and not drawings of them.
