## Customer Reviews

I have used this book so often, it's dog-eared and tattered! Whether you have children, teacher children or have neighbor children, this is one that will come in handy. You tell a story as you cut a piece of paper, and the shape that you are left with ties into the story. You don't have to be artistic or creative to be successful with Fold and Cut Stories. I have used them with children as young as pre-kindergarteners up through high school seniors. All are fascinated. It's an incredible tool that no one should be without.

Love the idea of this. Remember being fascinated as a child with these types of fold and cut stories. Easy to understand. Glad I bought, but I would have preferred to have stories that revolve around holidays or more common events of children.

This is a must for creative reading to preschoolers and 1st graders. It is an immediate spellbinder for the children. The 2 activities together is such a magical thing for the children. I would definitely recommend this at home or in the classroom.

I bought this book and I have used it many times with Kindergarten kids. They enjoy the stories very

much. I do find some the cutting hard and recommend practicing and/or drawing the lines before you cut as a guide.

I found this product very useful, with my pre school classroom it was very interactive, the delivery was fast and it was price affordable
