Customer Reviews

I was nervous buying this because there are not a lot of pictures for me to look at, so I relied on the Kumon name. This is a great book. I am sharing the table of contents and a page selection from the workbook. One side is math, one side is reading / language arts. The book has a cute double sided poster, which is the solar system and geometric shapes in the 4th / 5th book set. The books have a page to chart progress and add comments. The opposite side has a summer reading guide. The answer sheet is so small that I had to take a photo with my phone and then blow it up to read it...it's that tiny. I do wish the pages were perforated so I can tear them out instead of cut the pages out. I do recommend this book.

My son hates school.. And had a hard time getting him to even do the work book... But he actually likes it... So now in the A.m he just does his work with out a fight with a smile I might add. I even heard him laughing at on e of the stories thank you Kumons

Great review book for my daughter. It is a wonderful way to practice skills and review for the fall. Will be purchasing future books from this company.
