## Customer Reviews

My five year old loves this, and I enjoy doing it with her, which is more than I can say about some of her books. This was a desperation purchase, late at night, at a drugstore when I realized Valentine's Day was tomorrow and I had nothing to give her. I recommend this book!

We received several of the Everything Kids books in the mail a few days ago and my 6 year old daughter has been having a great time with them. This hidden pictures book is a challenge but she really enjoys spending time on locating the different items. And if you have a 6 year old you know

that after a few minutes, losing interest is the norm. So an activity that keeps her attention is always GREAT!

nice layout, could have used better quality paper and more color print, but all in all a good series of books, great for older kids.

I don't recommend this book at all. My son is very much into finding hidden pictures and this is one of the most boring books I've seen. The cover makes it look like it is colorful, but it has a total of two colors throughout the whole book...purple and green. Ugh! It is hideous! Honestly, some of the activities look like they could be fun, but the lack of colors just puts me off enough that I wish I hadn't spent my money on it. I will be looking for a better book.

Most youngsters love puzzles, but this book offers more than just brain work, it is perfect for rainy days, long trips in the car, or just spending time alone without the drone of television. The puzzles are challenging for ages 5 and up, some more difficult than others, and my kids enjoy the way the items are really well hidden in each scene. I love that it is lengthy and features various themes like Vacation, Meal Time, Playground, and so on. This edition will keep us busy throughout the entire summer vacation.

I bought this for my 5 year old, but it didnt interest him (even though several hidden pictures' books interest him). I realized that the activities require much more involved participation than what could be expected of a 5 year old.

My 80 year-old mother in-law loves these. She's sharp as a tack, so they aren't a big challenge for her, but they are a good time waster when she's had enough of the mental challenge of a good crossword.

My grandson is very detailed oriented and I thought he would love this book because he loves another similar book. I saw him open during his birthday party and put it down and came over to me right away and told me in my ear, "Grandma, I love the books better than my toys." I felt his sincerity...until he got his bicycle lol. But that's a no brainer....book? bike? Duh! Bike! I already purchased the Everything Kids Maze book.
