## Customer Reviews

I was very excited to get these little ladybug puzzles. I thought it would help my daughter with identifying her uppercase and lowercase letters. I just received this today and I am NOT happy. The puzzle cards are thin and flimsy. I have bought Match It! products before and the cards are thick and durable. Those cards even hold up to a two year old playing with them, and being stuffed into a bag and carried around to entertain my kids at various locations. These lady bug cards would bend. Don't buy these! I wish I had gotten: "The Learning Journey Match It! Upper and Lower Case Letters", because we just love that company's spelling card puzzles. The lady bug letters are worth around 3 or 4 dollars, not ten!

This is helping my toddler match her upper case and lower case, but I don't think the pieces will hold up for very long. Granted, this is geared at older kids who may be more gentle in handling them, but

some of mine peeled just when I was popping them out of the board for initial use.

My 3 year old toddlers love this puzzle. Each lady bug piece has a capital letter and a small letter for them to match. The back of the piece has a real picture (not animated) of something that starts with that letter. I have to say its been a great learning tool/ game for both kids. Recommended!

I own a daycare and my kids really like this. It is very heavy weight so I think it will hold up to lots of use. It is fun for them to turn over after they have matched the upper and lower case letter to see something that starts with that letter.

My son loves this game! This is perfect for kids who are learning their alphabet. It shows them both the capital letter and the lower case letter that you match together to make a lady bug. My son loves puzzles so it's great for those kids who love them like him.

this is a great little puzzle for both of my kids. I have a 2 year old and a 5 year old and they both love this. My 5 year old needs to work on her recognition of letters and this is the perfect thing for that. It also helps that there is a picture on the back side so if she doesn't know the letter she can say the word and figure it out

My three year old loves puzzles, so this is a great way for him to learn letters through play. I love that it teaches the relationship between uppercase and lowercase for each letter - I couldn't find many toys that do that. The pictures on the back are fun too, and it's made well - it should hold up well.

My preschoolers absolutely love this! It is such a great way for the. To associate the letters with their sound and also to match uppercase and lowercase properly.
