# 123 I Can Build! (Starting Art)

## Synopsis

This book in the Starting Art series provides an introduction to all the materials kids need to start building. They'll learn simple architectural techniques such as joining, roofing and folding, in addition to concepts such as foundation, structure and function. Projects include a breezy birdhouse, a mushroom mansion, a perfect palace and a fabulous funhouse. Budding builders will proudly say, "I can build!"

Product Dimensions: 9.5 x 0.1 x 9.5 inches

Shipping Weight: 3.2 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (2 customer reviews)

Best Sellers Rank: #633,413 in Books (See Top 100 in Books) #142 in [Books > Children's Books > Arts, Music & Photography > Architecture](#) #143 in [Books > Children's Books > Arts, Music & Photography > Art > Sculpture](#) #722 in [Books > Children's Books > Activities, Crafts & Games > Crafts & Hobbies](#)

Age Range: 4 - 7 years

Grade Level: Preschool - 2

## Customer Reviews

I love the "123..." art series. I have them all and am using them for my first grader's art program this year. The pictures/photos are colorful and illustrate the directions clearly. The projects are fun, whimsical, and creative. Best of all, they don't require a king's ransom in supplies, they're fairly easy to complete, and the end product is awesome. I love the little tidbits of information tucked away on each page (technical art terms, definitions, etc). This really is a fantastic series -- I highly recommend them all!

I didn't purchase this book from , but my 7 year old daughter just brought it home from her school

library and now I am thinking she needs her own personal copy. She was so excited to show me all the fantastic buildings you could make out of basic craft materials, such as printed scrap book or construction paper, modeling clay, twigs and even sugar cubes. I must admit, that the illustrations of the finished projects were probably not created by your average 7 year old, but they have inspired my daughter to build and create! Also, parents will love the educational quality of the book with definitions for "architect", "structure", "foundation", etc. This book is so well done, I am looking at other books by Irene Luxbacher. If your child loves to create, I highly recommend this book!
